Kite the Gorge – Request to add SUP to Concession Permit

- Carlos and Spring were unable to attend meeting.
- Committee members were in agreement that submittal for SUP should have been included during original RFP submission. Do not support adding on SUP to existing concession permit.
- RFP should clearly state (next time) that amendments or additions to proposal will not be approved.

Spit Improvements/Work Party

- Discussed Spit work party and what went wrong. CGKA took responsibility for cutting down tree with chain saw and apologized. Would like an opportunity to go back and clean up brush.
- In the future, a written agreement must be developed between Port and work party organization.

Event Site Issues

- Discussed dynamic between windsurfers and kiteboarders. Would like to encourage users to be more civil toward one another.
- CGKA and CGWA can encourage this via newsletters and on the forums.
- Liz will call Portland Reservoir Control to determine future water level forecast and end date for launching and landing. CGKA and CGWA to provide recommendation.

The May 31, 2013 meeting was adjourned at 2:15 p.m.
