3. **East Fork Hood River Diversion Headwork's and Fish Passage**

- Owner: East Fork Irrigation District- PM John Buckley (541) 354-1185
- Description: \$1.5 Million This project diverted 100% of the East Fork of the Hood River in order to construct an inflatable weir dam, an irrigation district diversion headwork's structure, and a new fish passage ladder along with all mechanical, electrical, and structural systems.
- Schedule: The construction of this project was accelerated in the middle of the project. All project stakeholders came to the table and agreed that although the required schedule by contract was being met, all parties would benefit from getting out of the river as soon as practical. The owner authorized a change order to pay for the acceleration and the project was completed three weeks early. Consequently, the day after we completed the project was the largest rain on snow event of the year.
- Budget: This project came ahead of schedule and on budget.
